

Objectives

Upon completion of the conference, participants will be able to:

1. Discuss nutritional counseling and vitamin, mineral and multivitamin supplement use with patients in practice settings.
2. Review a functional approach to the management of dementia in your practice.
3. Discuss the benefits of low dose antigen therapy in certain patient populations.
4. Describe how to set up an IV infusion practice and list the considerations.
5. Discuss implication in using HCG for weight management including safety and other patient counseling considerations.
6. Describe how to set up a pain management clinic using lessons learned in the field to avoid pitfalls.
7. Review the risks and benefits of ketamine in chronic pain management.
8. Review the safety and efficacy of bioidentical hormone replacement therapy.
9. Discuss the uses and effectiveness of NAD therapy in addiction disorders and in other areas of well-being.
10. Discuss the fundamentals of essential oils, including the biology, chemistry, safety and methodology.
11. Explain evidence based use of pulsed electromagnetic field therapy in the clinical setting.
