

Objectives

Upon completion of the conference, participants will be able to:

1. Discuss nutritional counseling and vitamin, mineral and multivitamin supplement use with patients in practice settings.
2. Describe the process for implementing a weight management practice.
3. Review a functional approach to the management of dementia in your practice.
4. Review the safety and efficacy of bioidentical hormone replacement therapy.
5. Describe how to set up a pain management clinic using lessons learned in the field to avoid pitfalls.
6. Describe how to set up an IV infusion practice and list the considerations.
7. Discuss implication in using HCG for weight management including safety and other patient counseling considerations.
8. Discuss the benefits of low dose antigen therapy in certain patient populations.
9. Discuss the fundamentals of essential oils, including the biology, chemistry, safety and methodology.
10. Discuss the implications for redox biochemistry in cellular inflammation and oxidative stress.
11. Discuss the uses and effectiveness of NAD therapy in addiction disorders and in other areas of well-being.
12. Review the indications for patient selection and use of radiofrequency ablation for metastatic bone lesions.
13. Explain evidence based use of pulsed electromagnetic field therapy in the clinical setting.
